The perfect sports glasses

Developed for athletes and with athletes.
Adidas eyewear are sports glasses with highly functional frames and high quality filters.

Whether bike, golf, running, outdoor or snow.
According to your needs and sport type the individual features are optimally combined.

For world records and personal bests.
The perfect outdoor equipment for demanding customers.

The perfect protection.
Eyes need the best protection. Frames, lenses and filters from adidas eyewear combine high end materials and high tech innovations into a functional unit. The perfect combination for perfect moments. Because every moment is valuable.

The innovation for eyes
LST Light Stabilizing Technology™

Better vision is crucial in sport; healthy light for the eyes is essential. LST™ stands for the innovative Light Stabilizing Technology from adidas. Dangerous light waves up to 400 nanometers are filtered and extreme light-shadow fluctuations are balanced out.

Best perception. The contrast enhancement ensures sharp contours, maximum peripheral vision and natural colors. For constant good vision even in scattered light.

Best protection. The lenses comply to supreme optical quality class 1 and offer a 100 % protection against UVA, UVB and UVC radiation as well as blue light rays. The filters can be changed easily and quickly with the Quick-Change Lens System™.

LST™ optimized light transmission protects the eyes, increases sporting performance.

- Maximum peripheral vision: Transmission peak at 430 nm
- Contrast enhancement: optimum blue light absorption
- Harmonization of extreme light fluctuations (light/shadow)
- Reduced transmission of light for less irritation of retinal receptors
- Natural colors: balanced relation of long and short rays

You have the target in your sights.
Clearer than ever.

support your vision
adidas.com/eyewear
Because it’s the moment that counts.

LST Bright is the lens that helps you to scan a moment’s opportunities with crystal clarity. LST Bright sharpens perception in all light conditions and enhances high-contrast vision especially in fog and diffuse light.

- Brightening effect under dim light conditions
- Improves visual performance
- Harmonizes rapid light/shadow changes
- Enhances contrasts

LST Bright. Perfect for snow, bike, outdoors, gold and running.

Best view, whatever the weather!

LST Varis is the lens that ensures excellent vision in any weather; LST Varis sharpens perception and due to its photochromic filters adapts automatically to different light conditions.

- Self-tinting lens automatically adapts to the environment by darkening or brightening as required
- Rapid reaction times
- Maintains rapid light/shadow changes
- Enhances contrast

LST Varis. Perfect for running and golf.

Get a head start.

LST Active is the lens that helps you to get a head start day after day. LST Active sharpens perception in all light conditions and specifically supports peripheral movement perception.

- Harmonizes rapid light/shadow changes
- Enhances contrasts
- Improves peripheral vision
- Ensures clear perception of all terrain irregularities
- Brightening effect

LST Active. Perfect for bike, golf, snow, running and outdoors.

The only good reflections are in the mirror.

LST Polarized is the lens that protects your eyes against irritating reflections and dazzle; LST Polarized sharpens perception in all light conditions and effectively eliminates light waves reflected by brilliant and shiny surfaces.

- Improved contrast vision compared to normal polarized lenses
- Prevents reflections caused by snow, water or wet asphalt
- Harmonizes rapid light/shadow changes
- Better vision with natural colors

LST Polarized. Perfect for watersports.

We bet you’ve never seen a green better!

LST Contrast is the lens that eliminates all visual handicaps. LST Contrast sharpens perception in all light conditions and enhances high-contrast vision especially against green backgrounds.

- Prevents dazzle and improves visual comfort
- Enhances contrasts for clear perception of physical terrain contours
- Preserves natural colors

LST Contrast. Perfect for gold and running.

Risky business - keep your eyes open!

LST BlueLightfilter is the lens that leaves you relaxed and confident even on the most challenging mountain treks. LST BlueLightfilter sharpens perception in all light conditions and protects your eyes reliably against high-energy blue light at high altitudes.

- Excellent eye protection against dangerous, high-energy blue light
- Harmonizes rapid light/shadow changes
- Improves peripheral vision
- High-contrast vision, especially important in mountain conditions

LST BlueLightfilter. Perfect for outdoors and snow.

Focus your vision.

Optical correction with RXready™

Ready for perfect vision?

The RXready™ concept.

from adidas eyewear guarantees athletes with visual impairments clear, undistorted vision: for maximum safety in every situation – even in extreme locations.

As individual as you.

The RXready™ System is adjusted to individual needs and different sport types. For athletes who want to achieve optimum performances with optimum vision.

Safe and advantageous.

Clear vision means less risk of injury // optimum reaction times // better risk assessment // reduced eye fatigue // increased concentration and performances // higher fun factor in sport.

Only those who recognize their target will achieve it.

support your vision

adidas.com/eyewear
Direct glazing (8-base)

Various models in the adidas eyewear collections Performance Casuals and Performance Sport offer the possibility of direct glazing.

The RX solution for sport and everyday use.

Adapter glazing (8-base)

RX optical adapter (nylor)

For the adapter glazing:
- maximum field of vision
- glazing by optician possible (such as Nylor glazing)
- more glazing possibilities with the adapter than with direct glazing
- we recommend polycarbonate lenses or RX glasses

RX optical adapter

RX optical adapter incl. clear demo glass for centering available. Please contact your national distributor.

You can find detailed RXready information in the RXready catalogue folder (K 0000 A1 2011 0000)

Performance Insert™

Performance Insert™ - rim

- Performance Insert: the sun filter protects against outside influences
- low cost method to change the sun filter according to the light conditions
- suitable for sports glasses up to 10 base
- easiest glazing
- easiest assembly (warming up not necessary)
- lowest cost solution for the glasses
- quick and easy glass change regardless of glass material

Performance Insert™ - rimless

- practically invisible
- Performance Insert protects against outside influences by sun filter
- lowest cost methods to change the sun filter according to light conditions
- suitable for bifocal and progressive glasses thanks to deeper glass shape (a714/a715)
- large selection of shapes
- suitable for bifocal and progressive glasses

Visible consumer benefits

01 vision

For a maximum field of vision.
- Wrap-around frame and wrap-around filter.

Optimal vision in all light conditions.
- Light Stabilizing Technology™ provides constant view.
- Quick Change Lens System™ enables you to adapt your equipment to all light and weather conditions.

02 protection

Maximum protection.
- Frame construction made from breakproof SPX™.
- Polycarbonate lenses can withstand strong impact forces.

Safety for your eyes.
- The best protection from harmful UV-A, UV-B, UVC- and blue light rays.

03 fit

The individual fit.
- Most of our products are available in two sizes.
- Double-Snap Nose Bridge™ and TRI-FIT™ temples adapt your eyewear for a personal fit.

Secure and comfortable fit.
- Traction Grip™ and Flex Zones™ provide a non-slip, pressure-free and stable fit.

04 durability

Highest longevity.
- Breakproof and durable material, UV resistant and temperature-resistant, for highest longevity.

Long-lasting wearing comfort.
- Supreme material, and innovative technologies guarantee high durability.

01 – 04
The perfect combination.

Four excellent benefits characterize the quality of adidas eyewear.
01 vision for the best vision.

Advantage one. The maximum field of vision.

Dynamic ventilation. Wrap-around view.

ClimaCool™ technology by adidas is based on a dynamic ventilation technology. The air is directed in a way that is not intrusive or disturb your eye sight. Additionally the special Nano-Foam™ manages moisture and prevents fogging.

Wrap-around lens (up to 10-base). The extensive up to 10-degree curvature of the lens provides you with the added field of vision and optimum protection of your eye area.

Advantage two. Optimal vision.

Adapter and insert glazing. Light Stabilizing Technology™.

adidas eyewear can be easily used for optical correction - either through direct inframe glazing, optical adapters or through performance inserts (rim or rimless). For a maximum field of vision and optimum perception.

No matter which light condition, the Light Stabilizing Technology™ provides a constant view with contrast enhancement, maximum peripheral view and natural colours.
02 protection for optimum protection.

Advantage one. Maximum protection.

Sweat blocker and nose cover.

Additionally to the wrap-around frame construction the detachable sweat blocker prevents sweat from running down into your eyes and obscuring your vision. The nose cover protects you against harmful light and UV. Nose cover and sweat blocker can be easily removed and replaced when needed.

Wrap around frame.

The wrap-around frame technology guarantees a maximum field of vision and gives you a snug fit. It ensures that the eyewear will not dismount and protects your eyes from external influences.

Advantage two. Safety for your eyes.

Quick-Change Lens System™.

Simple, fast but sturdy lens changing feature that enables you to easily adapt your equipment to all light and weather conditions. The lenses comply to supreme optical quality class 1 and offer a 100% protection against UVA, UVB and UVC radiation.

Impact resistant.

The polycarbonate material of the lens can withstand strong impact forces. This combined with extreme wrap-around lenses (up to base 10 curvature) protects the eyes from irritating external influences such as dirt, rain, wind, insects, pollen etc.
visible consumer benefits

03 fit for the perfect fit.

Advantage one. The individual fit.

For every nose.

Double-Snap Nose Bridge™. To optimize the resting position on your nose, the Double-Snap Nose Bridge™ provides you with a double width adjustment. The non-slip, soft material gives you a secure and comfortable feel.

For every head.

TRI.FIT™. With the 3-level height adjustment you can adjust your eyewear for an optimum fit. Additionally, this exclusive feature of adidas eyewear compensates for the angle of incidence of light rays, thereby eradicating the dazzling effects caused by these rays.

Advantage two. Secure fit.

Helmet compatible.

An optimum fit and helmet compatibility is provided by the 2-frame levelling™ system of the id2 goggles. The detachable and flexible front part automatically adapts to your helmet size. The clever concept for clever heads is called 2-frame levelling™ and stands for helmet compatibility with exact fit.

Light and flexible.

A non-slip, pressure-free and stable fit. Your eyewear stays where you need it. SPX™ is an extra-light, break-proof and allergy-free material with incorporated Flex Zones™. Together with the Traction Grip™ it provides the necessary flexibility and wearing comfort.
visible consumer benefits

04 durability for longevity.

Advantage one. Highest longevity.

Releases instead of breaking.

Quick-Release Hinges: Rather than your eyewear getting damaged, the temples release under exertion of impact force. The temples are easily and quickly reinserted or you can replace them by head straps, which accompany certain models.

Bends instead of breaking.

SPX™ is an extra light, break-proof and allergy free material with incorporated Flex Zones™. It guarantees a non-slip, pressure free and stable fit. Your eyewear stays where you need it.

Advantage two. Highest wearing comfort.

Tough.

The Vision Advantage™ PC lenses made from polycarbonate material incorporate a nanomodified water-repellant anti-scratch coating. The special multilayer construction makes the lens highly resistant, ensures a long product life and withholds strong impact forces.

Sophisticated lens fixation.

Quick-Change-Lens System™ Sophisticated lens fixations guarantee both, a proper fit but still easy lens changing. Simple, fast but sturdy – your adidas eyewear lenses are built for easy handling. No matter which light and weather conditions, with one easy movement you will be well prepared.

support your vision — adidas eyewear
**Evil Eye Halfrim Pro**

**Technical Specifications**

- **Frame Material:** Lightweight and durable materials ensure comfort and protection.
- **Lens System:** Anti-fog lenses provide clear vision under wet conditions.
- **Adjustment Options:** Quick-change lens system and vented frame for easy adaptation to changing weather conditions.
- **Ventilation:** High-performance ventilation ensures maximum air circulation for clear vision.

**Color Options**

- **Grey and Grey Mirror:** Ideal for high-visibility conditions.
- **Neon Blue:** Enhances visibility in low-light environments.
- **Neon Orange:** Bright and striking for visibility.

**Frame Sizes**

- **41 mm Height by 35 mm Width:** Comfortable fit for most face shapes.
- **RX Catalogue:** For prescription lenses.

**Accessories**

- **Microfiber Bag:** For cleaning and storing your glasses.
- **Hard Case:** Durable and protective for long-term storage.

**Compatibility**

- **Helmet Compatible:** Ensures a secure fit under extreme conditions.
- **Double-Snap Nose Bridge:** For a secure and stable fit.

**Maintenance**

- **Ventilation System Performance Insert:** Prevents moisture accumulation on the lenses.

**Additional Features**

- **SPX™ & Flex Zones™:** For enhanced comfort and flexibility.
- **Traction Grip™:** Non-slip, pressure-free fit for maximum stability.

**Supplementary Information**

- **SHS Series:** Microfiber bags for lens care.
- **FK Series:** Protect your eyewear with durable cases.

Jessica Ennis, GBR
The air is directed in a way that it is not intrusive or disturbs your eye sight.

The Performance Insert™ solutions can be easily and rapidly clicked in behind the outer lens to all performance sports eyewear models.

With the 3 level height adjustment you can adapt your eyewear for an optimum fit.

Non slip, pressure free and stable fit. Traction Grip™ provides the necessary flexibility and wearing comfort.

Rather than your eyewear getting damaged, the temples release under exertion of impact force. The temples are easily and quickly reinserted.

Simple, fast but sturdy lens changing feature that enables you to easily adapt your equipment to all light and weather conditions.

SPX™ is an extra-light, breakproof material. Flex Zones provide an extremely comfortable fit.

Ventilation System

snow

support your vision — adidas.com/eyewear
a184 id2 pro

Nano Foam™ Double Layer Foam
- Prevents snow or rain and water from penetrating through to the lens.

Quick-Shift Lens System™
- Spherical; fast but solidly lens changing feature.

Performance Insert™ Available
- The Performance Insert™ solutions can be easily and rapidly closed in front of the outer lens to all performance sports eyewear models.

ClimaCool™ Ventilation System
- Airframe system of continously tested special lens shape guarantees sufficient ventilation behind the lens.

Spherical Single Lens
- LST Active silver lens.

Quick-Shift Lens System™
- id2 pro with 5 base lens is wider than id2 with a base lens.

Vision Advantage PC Lens™
- The lightweight polycarbonate lenses provide 100% UV protection, have strong resistance to impact forces and comply to supreme optical quality class 1.

Siliconized and adjustable Strap
- for perfect fit.

2-frame Leveling™ + detachable front part: helmet compatibility System™
- The dual frame technology ensures that the goggles are compatible with any helmet as the front frame stretches out to fit the helmet while main frame sits snugly on the face.

Quick-Shift Lens™ (QSL™)
- With 1 hand and 2 clicks you can react to changing weather or light conditions. The Quick Shift lens goes in the front frame and forms a second lens. You can click in the lens whilst wearing the goggle.

Spherical Single Lens
- LST Active silver lens.
